THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

[redacted] seven Soviet destroyers coming from the direction of Porkkala and passing at high speed on an easterly course were sighted in the Gulf of Finland. When heaving into sight [redacted]

[redacted] the destroyers put up a smoke screen and left a brown oily layer on the water surface from which thick yellow wisps of fog developed. The destroyers were of identical type. They had two smoke stacks. There was a high mast on the foredeck and a short one aft.

Comment. The vessels cannot be identified. A concentration of such a large number of destroyers in the Gulf of Finland was observed for the first time. The vessels possibly were minesweepers of the Polukhin Class rather than destroyers.
